

## HDA-220 Air cushion machine

### Features:

1. Vertical type film loading way
2. Small footprint fits on tabletop
3. Speed up to 15 meters per minute
4. Compact design for small spaces, space saving
5. Easy-to-use for high packing productivity, low maintenance
6. Easily adjustable to control air volume, speed, temperature

### Technical data:

Model	HDA-220
Speed	0-15 M/Min (Adjustable)
Net weight	22KG
Gross weight	27KG
Power	320W
Power supply	110V / 220V 50/60HZ 1PH
Machine dimension	L730*W300*H290mm
Package dimension	L750*W380*H400mm
Suitable film	HDPE+Nylon Film
Suitable Film Type	Air Column/Air column bag
Air	0.5-0.8mpa
Air volume	0-300L/Min(Adjustable)

### Scope:

Air cushion machine is perfect choice for e-commerce, express logistics, printing supplies industry, ceramics and cosmetics, handbag and luggage, electronic products, automobile parts, fruit.

### Description:

HDA-200 is an auto air column cushion machine, which saves labor cost effectively and avoid the bag broken caused by the unstable air-charging, excessive air volume from tradition manual inflation, reduce the broken rate of product effectively. HDA-200 with faster speed, more stable air pressure and better efficiency compare with the manual inflation. It's

available for 15cm-120cm packing material like air column bag,U type air bags,L type air bags,etc.(note:need connect air compressor)  
What our machine can do:

Washing industry

Electronics industry

Milk powder industry

Wine industry

Food industry

Phone
